DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed April 6, 2005 lists US Patent 5,545,484 which has been considered, however its relevance is not readily apparent. It is suggested that Applicant reviews the submitted list of references to ensure that the correct patent numbers are listed.

Specification

2. The abstract of the disclosure is objected to because in line 1, the phrase "The invention relates to" should be deleted. Correction is required. See MPEP § 608.01(b).
3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: claim 3 recites "the form having a diameter smaller than a width of the flatly folded substrate": this limitation should be clearly disclosed in the specification.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
5. Claims 3-5 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a "form" and a "flatly folded substrate", does not

Art Unit: 3726

reasonably provide enablement for “the form having a diameter smaller than a width of the flatly folded substrate”. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. There is no disclosure of “the form having a diameter smaller than a width of the flatly folded substrate”.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, line 6, it is not clear what is considered the “width of the flatly folded substrate” since Applicant has not defined the different geometrical sides of the substrate. Furthermore the “form” does not appear to be of a cylindrical shape to have a diameter as claimed. Although Applicant discloses the “form” designed with the contour of a plastic cup, however the graphical representation of the form does not show a cylindrical shape. Applicant also needs to positively recite the “insertion slot” in relation to the “form”.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
